## Economic Growth Linkages Bibliography

Tags: Economic Development, Bibliography

In 2016 ICED undertook an extensive review of evidence available to support linkages between infrastructure delivery, support for improved urban productivity, and economic growth. The review was undertaken in order to provide a valuable resource for donors designing programmes or interventions.

A series of papers then analysed this evidence presenting a theory of change from activities to outcomes and economic growth impacts, constraints of emerging growth narratives, implications for programme design, and evidence gaps requiring further research. These and associated research can be found on the ICED portal. For further information regarding this review please contact [iced.programming@uk.pwc.com](mailto:iced.programming@uk.pwc.com), follow @icedfacility on twitter, or consult our medium blog <https://medium.com/iced-facility>.
